

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

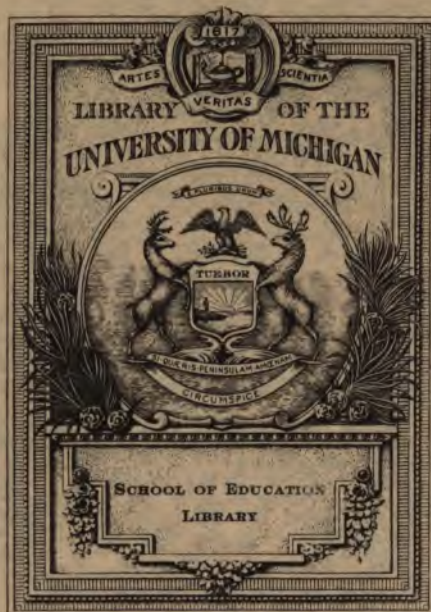

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

REPORT OF THE PRESIDENT.

The Board of Education of the School District of Cincinnati herewith submits its Annual Report for the school year ending August 31, 1905, being its seventy-sixth Annual Report.

DEATH OF JACOB E. CORMANY.

During the year the Board suffered a severe loss in the death of Mr. Jacob E. Cormany, its oldest member in point of service. He had been in the Board continuously for more than twenty-five years. In his work as a member of the Board, and in his place as Chairman of the Committee on Buildings and Repairs, he rendered valuable service to the schools and to the community.

STATE SCHOOL EXAMINER.

The books and accounts of the Board were examined by Mr. J. C. Fowler, State Examiner, during the month of March. He certifies that they are correct in every particular.

NIGHT SCHOOLS.

That the work of the Night Schools is appreciated by our citizens was conclusively shown at their Commencement Exercises, held in Music Hall on May 26. The hall was crowded with the friends and relatives of the graduates, and the orations and essays of the speakers of the evening were highly creditable.

The work of this department should be developed and encouraged in every possible manner, and the greatest facilities offered these young people for the completion of their education.

MEMORIAL DAY.

The Board followed its custom on Memorial Day. The schools were closed. The children of the down town districts marched with the ranks of the veterans on their way to Spring Grove Cemetery. A number of the suburban schools attended the cemeteries located near them and there assisted in strewing flowers over the graves of the heroes of 1861-1865.

FREE TEXT BOOKS.

By extending the Free Text Book System to all the grades we have accomplished that which has been contemplated by the Board for many years. Principals should see that the teachers give proper supervision and inspection under the new rule adopted by your Board, in order that the books be not destroyed by heedless children and appropriate lessons of care of public property be taught them.

By completing this system, the Board brings education free to the homes of all, thus fulfilling another one of the purposes for which such boards are created.

NEW OFFICIALS.

During the year the positions of Mechanical Engineer and Custodian of Supplies were created. Experience has shown that it is impossible for the Superintendent of Buildings to attend to all the details of his department. The Custodian will take charge of all supplies and give them to principals and janitors as circumstances warrant.

The Mechanical Engineer is to prepare plans and specifications for heating and ventilating apparatus and see that it is properly installed in both new and old buildings. He shall instruct the janitors in the matter of stoking, and have general supervision of all heating and ventilating apparatus in school buildings. Mr. E. N. Hannaford, the gentleman chosen to fill this position, has already proven that your Board made a wise choice in his selection. He has shown marked efficiency in the work already accomplished.

NEW STORAGE WAREHOUSE.

A building specially constructed, with a view to its use for warehouse purposes, has become an urgent necessity.

The lot which was formerly used for the Gaines' High School on Court Street, near John, is centrally located, is within a short distance of the City Hall, is large enough to contain a commodious building, and would admirably answer the purpose.

The supplies are now scattered in various places, some of which we rent, and they should be in one building, under the im-

mediate control of the newly-elected Custodian. In this building the repair of the text books can be carried on during the year.

It could be adapted to stable the horses and wagons used by the Board, and a considerable saving in rent made by the change.

BETTERMENTS OF OLD BUILDINGS.

The improvements to be made on the older school buildings is progressing as rapidly as circumstances will permit.

Work on the additional story to contain the auditorium and other necessary features is progressing at the Tenth District building, and it is hoped, will be completed in time for the opening of school. Improvements in the heating and sanitary arrangements of the First, Twelfth, Twentieth and Columbian Districts have been ordered, as these seem to be the buildings in which the present arrangements are most faulty.

Sufficient funds will be set aside this year to enable the Committee on Buildings and Repairs to make the necessary betterments in such of the older buildings as will not be reached this year.

It is unfortunate that no sewers have been laid in a number of streets on which public school buildings abut, and that yard vaults still exist in those places.

However, the plans of the Committee on Buildings and Repairs contemplate the connection of all closets with the city sewers and placing the same within the buildings wherever it is feasible.

In all, the sum of \$80,000 will have been spent this year in the various repairs and improvements of old buildings.

Among other features touched upon, thirty thousand square feet of natural slate blackboards have been added to the buildings to relieve the eyes of the children from the glare produced by the worn condition of the artificial slate.

All the new buildings are being equipped with this material, as experience has shown it to be best for the purpose.

NEW BUILDINGS.

Three new buildings are now under construction: the Clifton, Evanston and Central Fairmount. They will be equipped with the most modern school appliances, and will be models of school architecture. Plans are being drawn for the Avondale and

First Intermediate buildings. When they are completed Cincinnati will have added to her system five of the finest public school buildings in the United States, and ones of which the city will be proud.

NEW LOTS.

Five tracts of land have been acquired by the Board to furnish schools for our growing suburbs or give additional yard space to our down town schools. One tract was added for playground purposes to the Twenty-seventh District School. Additional ground was needed for the new First Intermediate building at Baymiller and Gest Streets, and the growth of Hyde Park and Northside compelled the purchase of additional ground for those suburbs. The land at Evanston was acquired to do away with the over-crowded colonies in that district. The lot acquired for Northside adjoins the present Kirby Road School. While the land selected in Hyde Park, at Madison Road and Williams Avenue, lies about a mile and a half from the present Hyde Park School, and is intended to accommodate the children in the region adjacent to it.

BOND ISSUE.

The sum of \$100,000 has already been realized from the sale of bonds, and this has been partially expended on the new buildings in course of construction.

Owing to the phenomenal amount of new building going on throughout the city, labor is very scarce, and the buildings are not progressing as rapidly as we would wish.

Not only have we issued bonds, but we have redeemed bonds heretofore issued by our predecessors.

The Trustees of the Sinking Fund have been instructed to redeem \$25,000 worth in October. This will make \$50,000 worth redeemed during the current year.

WORK OF THE TRUANT OFFICERS.

The wisdom of the Board in furnishing Truant Officer Clement with two assistants has been demonstrated by the increased results accomplished by his department, 7,298 cases in all having been investigated.

All cases of child labor and truancy reported to him receive

prompt attention. That his work is effectual is attested by the fact that 674 notices were served on employers reported as employing minors of school age.

It is to be noted that the cupidity of parents, rather than their necessity, is responsible for much of the abuse of child labor. Many of the parents force their children to work when of tender years for the sake of the pittance that is added to the family receipts.

Employers, almost without exception, are able to prove that they have been imposed upon in the matter of the age of the minors, and readily discharge them at the instance of the Truant Officer.

He reports the apparently large number of 4,211 returned or placed in school.

It is hoped that he will continue his efforts and assist in doing away with this evil. According to published reports, Cincinnati is much freer from this abuse than most of our large cities.

Your Board is to be congratulated that it is doing so much good in this direction.

THE MERIT SYSTEM.

The adoption of the Merit System in the appointment of teachers has been probably the most noteworthy feature of the year's work. There has been universal praise of this action. Citizens of all classes realize the sincerity of the Board's assertion that it proposes to upbuild our school system.

Whatever criticisms, whether justly or unjustly, were made of our teaching corps, must in a short time disappear when merit, and merit only, forms the basis of appointment.

In taking this step the Board further emphasized its determination to legislate for the best interests of the children, and that other interests shall be subordinate.

INCREASE OF SALARIES.

Your Board did a humane and praiseworthy act in increasing the salaries of all teachers in the elementary schools.

No class of public service is more trying than that of teaching. None gives greater value to the State.

The Cincinnati teaching corps is admittedly above the average, and contains a very large proportion of well-trained, cultivated and thoroughly-equipped teachers.

While the increase is not as great as some would wish to see, yet it recognizes the worth and efficiency of these well-trained public servants.

THE NEW DEPARTMENTS.

The exceptional ability of Superintendent Dyer as a school administrator, while exhibited in numberless ways, was never more markedly shown than it was in the organization of the new manual training, domestic science and kindergarten departments.

His selection of Prof. Ball, who won high praise for his work in organizing Manual Training departments in the public school system of Porto Rico for the United States Government, is but another instance of his wise and painstaking care of the interests of our schools.

Five manual training centers will be opened in September, and others will be added in January.

Two kindergartens will be established in September. These are our first public kindergartens, but they will be added to as circumstances warrant.

CO-OPERATION WITH THE UNIVERSITY.

Acting through a joint committee, the Board of Directors of the University and your Board will have charge of that department of Pedagogy at the University which supervises the training of teachers in Normal School work.

It seems fair and reasonable for this Board to assist the University financially to a certain extent, because by our rules we compel candidates for positions as teachers to attend the University, thus devolving considerable additional work on that institution, and we no longer conduct a Normal School of our own. It is to be hoped that the arrangement made will be satisfactory to both boards, and that they will work in unison.

As professor, in charge of this department, Superintendent Dyer, in conference with President Dabney, of the University, has selected Professor John W. Hall, of the Teachers' College, Columbia University, and eminently successful in this line of work.

INTEREST OF CHILDREN PARAMOUNT.

Whatever differences of opinion exist as to the proper board to manage the High Schools, or the proportionate number of members to comprise a Union Board, these should not for one moment be permitted to interfere with the intention of the Board to erect a new High School.

A new building is an imperative necessity. This Board has the funds at its command with which to relieve the situation, and the responsibility rests upon this Board to do so.

A solution to the problem of the High School management can be worked out as well while the new building is being constructed, as it can before the building is commenced.

A most commendable step was taken in this direction when the Board selected a site on which to erect a new building. It is gratifying to know that the choice of the lot meets the approval of that class of our citizens whose approbation is most to be desired.

I would urge the Board to use all reasonable diligence to prepare plans and proceed with the erection of this building.

We should sink all differences of opinion and have in view only the best interests of our children.

CONCLUSION.

Much good has been accomplished by your Board. I bear cheerful testimony to the disinterested, conscientious work of my fellow members.

It bespeaks further progress.

Your course of conduct meets the approbation of all fair-minded lovers of our public schools.

I desire to thank most sincerely the members and officers of the Board, for the assistance always courteously rendered me in the performance of the duties that devolved upon me.

Respectfully submitted,

JOHN G. O'CONNELL,

President.

CLERK'S FINANCIAL REPORT.

CINCINNATI, September 5, 1905.

*To the Honorable, the Board of Education
of the School District of the City of Cincinnati:*

GENTLEMEN—Herewith I submit to your honorable body a statement of the receipts and expenditures of the Board for the fiscal year ending August 31, 1905:

Furniture for Old Buildings.....		3,500 00
Supplies		4,500 00
New Text Books.....		3,000 00
Renovation of Text Books, Covers, etc.....		2,000 00
Supplementary Reading and Teaching Apparatus.....		5,000 00
Rent		4,000 00
Gas		3,500 00
Printing		2,500 00
Incidentals, Census, Institute, Commencement Exercises H. S.		5,600 00
Kindergarten Equipment and Supplies.....		500 00
Manual Training and Domestic Science (Maintenance).....		3,000 00
Manual Training Equipment of 7 Centers.....		7,000 00
Contingencies		15,000 00
Total.....	\$	253,980 00

The estimated receipts from State appropriations together with the receipts from other sources being \$255,565, it becomes necessary to raise the sum of \$955,185 from local taxes. Your Committee therefore recommends the adoption of the following tax levy upon the taxable property of the School District for the year 1906.

TAX LEVY.

Tuition Fund.....	2.903 Mills
Contingent Fund.....	0.977 Mills
Bonds, Interest and Sinking Fund.....	0.255 Mills
Total Levy.....	4.135 Mills

This levy, together with the State appropriations and other receipts from various sources, we believe, will produce the required amount.

Respectfully submitted,

LOUIS J. DAUNER,

ANTON BERGER,

FRED EGGERS,

E. G. BETTY,

COMMITTEE ON FUNDS AND CLAIMS.

ANNUAL REPORT
OF THE
SUPERINTENDENT OF SCHOOLS.

In compliance with the laws of the State of Ohio and the rules of the Board of Education of the School District of the City of Cincinnati, I herewith present a brief statement of the work of the past year in the Public Schools of this city.

In accordance with the new School Code of Ohio, the Board of Education, consisting of 27 members, 24 chosen by wards and 3 at large, was elected in November, 1904, and was organized January 2d of the present year.

Shortly after the election and before organization, a committee of eight, consisting of five members of the Board, the Superintendent of Buildings, the architect, and the Superintendent of Instruction, visited schools elsewhere. The schools of St. Louis were chosen, as unusual efforts had been made there to exhibit an ideal school system as one of the features of the Louisiana Purchase Exposition. The committee gave especial attention to elementary school buildings, high school buildings, methods of heating, equipping, and repairing, manual training, kindergartens, courses and methods of instruction, the manner of selecting teachers and means used to improve their efficiency. The superintendent also visited Indianapolis, Chicago, and Milwaukee.

Immediately after the organization of the Board in January, a committee of five, three of whom were on the visiting committee before mentioned, were appointed to revise the rules and regulations of the Board. This important task, involving the entire policy of the administration of the school system, engaged for about five months the attention not only of the committee, which held meetings at least once a week, but of the whole Board at many called meetings. The results of these deliberations, which

are of public interest, will appear in the account given of the work doing in the different departments.

For convenience of arrangement the following order of treatment will be observed :

SYNOPSIS OF REPORT.

- I. THE DEPARTMENT OF CONSTRUCTION : 1. New buildings, a modern school building; 2. Additional grounds; 3. Improvements in old buildings; 4. Care of school plant—superintendent of buildings, mechanical engineer, janitors; 5. Basements abandoned, over-crowding regulated.
- II. THE DEPARTMENT OF INSTRUCTION : 1. Teachers,—professional work, limit of number of pupils, salaries, promotions, University aid, method of appointment and promotion, retirement and pensions; 2. Course of Study,—the common branches, special departments,—German, drawing, physical training and hygiene, (including medical inspection), music, writing, kindergartens, manual training, blind and defective children; 3. Text books and supplies, custodian; 4. Evening schools; 5. Allied Educational Agencies,—University, Kindergarten Association, Vacation Schools, Public Library; 6. Attendance,—truant officers, Juvenile Court; 7. Examinations.

I. DEPARTMENT OF CONSTRUCTION.

1. NEW BUILDINGS.—The following are in process of construction :

Clifton—A new two-story structure on the site of the old building, contract price..	\$141,539 00
Evanston—A two-story structure, new site, contract price.....	129,529 00
Fairmount—A two-story structure, new site, contract price.....	136,200 00

The following are agreed upon by the Board, plans now ready :

First Intermediate, Baymiller and Gest streets, containing 32 rooms, besides auditorium, two gymnasias, library, play-rooms,

manual training shop, domestic science department, kindergarten, teachers' assembly room, museum room, lavatories, etc.

Avondale, same as above, except 22 rooms.

The following are contemplated in the near future:

Eleventh District, Clinton and Everett streets, oldest school building in the city.

Kirby Road, Cumminsville, a large addition, or a new building; school over-crowded.

Fourth Intermediate, Baymiller near Dayton street.

Hyde Park, new site near Oakley, two miles north of present building.

Hughes High School, site to be changed farther north, at Clinton, Everett, and Linn streets.

The law permitting an issue of bonds annually to an amount not to exceed 2 mills per dollar of the tax valuation, limits the Board to an expenditure of about \$400,000 a year for purposes of improvement. However, in view of the present scarcity of labor, and the price of building materials, this is probably as rapid an expenditure of money as is judicious.

THE MODERN TYPE OF SCHOOL BUILDING.—The following are some of the features of the houses that are being erected in this and other cities:

(1) The buildings are two story, of fire-proof construction, and are provided with a commodious auditorium, and rooms for manual training, kindergartens, library, etc.

(2) The basements are high, dry, airy, and well lighted, floored, and finished for play-rooms, gymnasias, and shower baths, for both sexes.

(3) The heating is by steam, both by direct radiation in school-rooms, and indirect radiation in basement, with a mechanical hot blast forced by strong pressure to each room separately.

(4) The air is purified on entering the school-room by coke washers where necessary, is evenly distributed to all parts of the rooms by distributors at the rate of 30 cubic feet a minute per pupil, and is drawn out through the cloak-rooms at the floor level.

(5) The temperature and air supply are regulated automatically, requiring no attention of the teacher.

(6) The rooms are several feet narrower than those of the old type, in order that the light may reach to the side farthest from the windows. The windows are banked on the pupils' left, and reach nearly to the ceiling. The light does not have to go

more than two and one-half times the length of the window to reach the farthest side.

(7) The lavatories and toilet-rooms are easily accessible, strictly private, well ventilated, and (are believed to be) perfectly sanitary.

(8) The stairs are of metal, the corridors are light and roomy, the floors are hard wood laid on concrete, the blackboards are low and are of slate with brackets above for illustrative purposes, bookcases and teachers' closets in each class-room are built in the walls, cloak-rooms are well-lighted, heated, and ventilated.

(9) Kindergartens and manual training rooms are placed where easily accessible, are especially adapted in construction, and equipped with suitable accessory rooms. For illustrations of new buildings see elsewhere in this volume.

2. LOTS AND GROUNDS.—(1) The Board has this year purchased or taken steps leading to the purchase of additional lots as follows:

Hyde Park—A two and one-half acre site near Oakley.

Evanston—225x227 feet, in North Walnut Hills.

Fairmount—A four-acre site, near the Harrison Pike.

Twenty-seventh District—A lot of 25x170 feet, contiguous to school.

First Intermediate—Contiguous lots amounting to 131x100 feet.

Kirby Road—Contiguous to school, 200x100 feet.

Hughes High School site—Clinton and Everett streets, 200 feet square.

(2) In improving grounds, paving and grading lots, building retaining walls, etc., some of the larger expenditures in addition to the above are as follows:

Harrison School, Sedamsville.....	\$ 4,170
Whittier School, Price Hill.....	2,000
Fairmount	11,600
Hyde Park, near Observatory Road, and Lincoln on Delta avenue.....	5,000

3. IMPROVEMENT OF OLD BUILDINGS.—Flush closets have been placed in the Hoffman School at a cost of \$1,800, and toilet-rooms for teachers in the First, Twelfth, Twentieth, Twenty-third, and Sherman Schools. Plans were drawn for flush closets for pupils at the First, Twelfth, and Twentieth, but the estimates of

from \$2,800 to \$4,000 each were so far exceeded by the bids, which ran from \$7,500 to \$12,000 each, that they will be re-advertised and new bids received, before contracts are let.

Extensive repairs include, (1) Elevation of roof of the Tenth District building, and adding a third story with auditorium, etc., contract, \$9,226. (2) Improved lighting, including new windows, frames, etc., in the Fulton School on Eastern avenue, Guilford School on Sycamore street, and the Fifteenth District on Main street, cost \$5,800. (3) New slate blackboards, (35,000 sq. feet), have been placed in nearly all old buildings. (4) Air purifying and cooling system in the Morgan School, cost about \$1,500. (5) An improved steam heating plant, by direct and indirect hot blast radiation, in the Columbian School, Avondale, cost \$7,075. (6) An annex or colony building of four rooms at Kirby Road, to relieve the over-crowded condition of the Cumminsville schools until a new building can be erected, cost \$2,000. Also two temporary six-room buildings at Clifton, while the new building is being erected. (7) All buildings needing it have been painted outside and in, and walls tinted.

Minor repairs, not including the first six items above, have been made at a cost approximating \$25,000. The total cost for repairs and improvements, not including lots and contracts for new school buildings, made or under way since September 1, 1904, approximates \$80,000.

4. CARE OF SCHOOL PROPERTY.—In addition to the superintendent of buildings a mechanical engineer has been employed to look after the heating and ventilation of buildings, and the plumbing and sanitation.

The pay of janitors has been increased about 20 per cent., and their duties clearly defined. They are to be selected by the principals of the schools, who are to be held responsible for the care and cleanliness of buildings. The following are some of the regulations for janitors, (very much abridged):

They shall sweep the floors of the entire building every day after the close of school, and carefully dust (with cloth) every piece of furniture, window sills and other woodwork every morning, at least one hour before the opening of school. Windows must be opened when sweeping, except in extremely cold weather, when there is danger of freezing the pipes.

Sidewalks and yards must be kept free from snow and ice,

and be scrubbed as often as is necessary to keep them perfectly clean at all times.

They shall scrub the floors of the halls and rooms, wash the stairs and woodwork as often as may be necessary for cleanliness, and at least every two months.

During the summer vacation all the floors, woodwork and furniture shall be thoroughly scrubbed with brush and soap.

Janitors shall remove all ashes, sweepings, and rubbish of all kinds from school buildings and grounds, and place them in receptacles at all times accessible to the city carts, and they shall keep the yards and grounds at all times free from litter of all sorts.

They shall clean the windows and sash at least once a month, weather permitting, and oftener if deemed necessary by the Principal.

Blackboards and chalk troughs shall be washed every Saturday, or oftener if desired by the Principal.

The cleaning and filling of ink bottles is the duty of the janitor, and the Principals will see that it is properly done by them as often as is deemed necessary.

Fires shall be built sufficiently early to have the temperature of the school rooms from 66 to 68 degrees Fahrenheit by 8:30 A. M.

Janitors must not leave the building during the day, except by permission of the Principal, and then only when sent on errands for the benefit of the school.

During cold weather they shall turn off the water supply and thoroughly drain the pipes when not in use, and keep up the fires in hall furnaces, so as to prevent freezing and bursting of pipes and ink bottles.

They will be required to pay all damages that the Board may sustain through their negligence.

Basements and water closets must be kept in a sanitary and wholesome condition. (Minute directions follow.)

In order that there may be satisfactory ventilation throughout the school building, the Mechanical Engineer should be consulted and his instructions followed.

5. BASEMENTS ABANDONED AND OVER-CROWDING REGULATED. —Possibly for the first time in the history of the schools of this city, no children will be housed in basements the coming year. Neither are any required to attend but one-half day in order to

give all an opportunity to attend school. The last basements abandoned are those at the Jackson School on Fifth Street, near Hughes High School, and at Kirby Road, Cumminsville. In the former school the children of the highest grade have been sent to the Fifth or Twelfth District Schools near by, in which buildings there are several unoccupied rooms. At Kirby Road a temporary "annex" of four rooms has been constructed to relieve the crowded condition of the Chase Street School, until a new building is erected.

II. DEPARTMENT OF INSTRUCTION.

1. THE TEACHERS.—It must not be forgotten that the worth of a school depends more upon the character and efficiency of the teacher, than upon any or all other things combined. A system which devotes all its attention to improving the condition of the school plant and neglects to improve the condition of the teachers is not only unjust to those who do the work and deserve the reward, but is overlooking the best interests of the children.

Care should be exercised in the selection of teachers. They should be appointed with an eye single to their qualifications. They should receive reasonable compensation. Their efforts to improve themselves and their work should be appreciated and rewarded. They should be given a liberal supply of tools to work with. The number of pupils should not be so great as to make effective teaching impossible. Directions should be definite, but should not unduly hamper individuality and freedom. They should be relieved of the worry of examinations and uncertainty of re-appointment, as long as they are doing their duty. Above all, they should feel that they are appreciated, not only by the Board of Education and its officers, but by the general public; they should know that they will at all times have humane treatment and sympathetic consideration, not simply as servants of the public, but as benefactors whose love and tender care and devotion are gladly given that our children may attain the moral and intellectual stature of ideal manhood and womanhood.

(1) *Professional Work of Teachers.*—In my last report I had something to say of the efficiency and spirit of our teachers. In this report it is due them that I should give a brief account of what they have done to improve themselves in the past year and to prepare themselves to carry out more effectively the new

This work has been done by them or even persuasion on the part of the Board of Education. I do not know what better evidence they could give than they propose to keep themselves growing and up-to-date so that our schools are abreast of the times.

Number of members of Ohio Teachers' Reading Circle.....	633
Number of teachers who took courses at the University.....	118
Number of teachers who took special courses with Dr. Forest, U. of C.....	40
Number of teachers who took History Club Work with Dr. Whitcomb, U. of C.....	75
Number of teachers in other similar clubs reporting.....	24
Out of 1,000 teachers.....	890

This does not include the very considerable number who have taken courses this summer at various universities, of whom there is not yet a record available.

The character of the work may be of interest. The O. T. R. C. course, mentioned above, is an organization of many of the progressive teachers of Ohio. Principal O. M. Patton is secretary for this city. Teachers organize into clubs, usually with a general as leader. There were circles in 50 of the 54 schools. They meet one hour after school each week, to discuss the required readings under the direction of their leader. He reports upon the work done at the end of the year. At the end of a four year course diplomas are given.

This year teachers choose three of the following: James' Talks to Teachers, White's Art of Teaching, Oppenheim's Mental Growth and Control, Judd's Genetic Psychology, Hinsdale's Art of Study, Geographic Influences in American History, by Brigham, Nature Study and Life, by Hodge, etc.

The History Club is a local organization effected last September. Several teachers and principals especially interested in the teaching of history took the initiative and met with a hearty response. They secured the services of Prof. Whitcomb of the University, as lecturer, and divided up into circles according to the grade they taught, pursuing lines of study in harmony with the course of study, under the direction of Principal Cummins, President, Mr. E. P. Goodwin, Eighth Grade Teachers; Principal Berry, Seventh Grade Teachers; Principal Bolenbaugh, Sixth Grade Teachers. Kemp's Method in History served as a basis of their study.

Course of Study. This work has been done by them without compulsion or even persuasion on the part of the Board or Superintendent. I do not know what better evidence they could give that they propose to keep themselves growing and up-to-date, and to see that our schools are abreast of the times.

The Mathesis has several organizations of teachers which have for many years devoted themselves to special lines of study. If its plans mature, it will greatly increase its usefulness by offering a strong University Extension Course the coming year.

The Schoolmaster's Club has a similar plan in view.

The effort that has been put forth voluntarily, both in the school room and in outside preparation for their work, will commend our teachers to the confidence of our citizens as it has to the approval of the Board. In improving the condition of our teachers, we are in fact improving much more the condition of our children. This is illustrated in the action of the Board in reducing the number of pupils to a teacher.

(2) *Forty Pupils to a Teacher.*—A teacher who must look after fifty or sixty pupils cannot give much consideration to the individual. Her energy is soon exhausted in trying to hold the attention of so many. This results in mechanical teaching and the neglect of individual pupils, or leads to over strain on the part of the teacher. *The old standard of fifty pupils* to a room has been superseded by the new rule:—

“Forty (40) pupils, average daily attendance, shall constitute a class. Any wide variation from this number is to be explained to the Committee on Teachers and Salaries, by the Superintendent of Schools.”

This rule is in harmony with the standards of the most progressive cities. It cannot immediately go into effect in some schools, especially in the most densely populated districts, but it is a new standard and will be put into operation as far as conditions permit. In at least one-half of the school rooms of the city an average daily attendance of forty has not been exceeded the past year.

The following regulation of transfers, will also check the over-crowding of certain schools, notably the Sherman, on Eighth Street:

“Principals shall not accept permits issued by local Trustees transferring pupils, unless they are approved by the Superintendent of Schools, when the number belonging is already 45 or above, in the room to which the pupils would necessarily be assigned.”

(3) *Salaries.*—Recognizing the greatly increased expense of living and the value of the services of our teachers, the Board has adopted a new schedule of salaries. The regulations make provisions

whereby almost every teacher of the elementary schools may eventually receive an increase of from \$50 to \$150 a year. The salaries of teachers of all grades will be uniform. The amount of the salary will depend not upon the grade taught, but upon experience and professional progress. Teachers of the first five grades, (comprising about 600 of the 1,000 teachers), formerly began at \$400 and went to \$700. By the new schedule they begin at \$450 and go to \$800, and by a promotional salary for professional improvement, to a maximum of \$850.

In the new schedule the aim is to level salaries at a fair maximum on a uniform basis, as shown below :

Principals in schools averaging over 600 pupils, \$2,000, increase of \$100; Principals in schools averaging 400 to 600 pupils, \$1,600, increase of \$100; Principals in schools averaging 250 to 400 pupils, \$1,500, increase of \$100; Principals in schools averaging less than 250 pupils, \$1,400, unchanged. Assistants in schools of class 1, having higher grades, \$1,400, increase of \$100; Assistants in primary schools of over 600, \$1,000, a new position. Teachers in all grades, \$800, and by further increase, \$850, (an increase in lower grades of \$150, in upper grades of \$50.) Special teachers, \$850, except male teachers of physical training, \$950; of shop work, \$1,100; of music, \$1,600 (unchanged). Supervisors of drawing, penmanship, physical training, manual training, \$2,000; of music and of German, \$2,100; of domestic science, \$1,200.

In order that the Board may meet the increased expense without embarrassment, the following regulation was adopted :

"If the maximum salary of any position is raised by the following schedules, the additional salary above the former maximum shall be given at one-half the regular annual rate of increase of the position."

"No person now employed shall suffer a reduction of salary because of the new schedule."

As these salaries affect about 800 teachers at an average of \$100 each, it requires an increase of the pay roll of about \$20,000 a year for the next four years, exclusive of kindergartens and manual training.

At the present rate of increase of taxable property, this increase of salary will be taken care of without increase of the rate of taxation, as the present levy for tuition purposes is 2.85 mills, and the increase of taxable property is 7 millions.

(4) *Promotional Salary*.—In consequence of the efforts put forth by teachers to improve themselves and their work by continuing studies bearing on education, the Board decided to show its appreciation of professional work, and adopted the following report (abridged here) of the Committee on Revision of Rules:

“By the rules already adopted, teachers’ salaries begin at \$450 and go to \$800; that is, they are given an increase of \$350 in salary by annual installments because of the increase in efficiency that is acquired by experience. This is right, but your Committee believes that a reasonable amount of mental activity and professional growth and advancement also adds to the efficiency of teachers and is necessary to keep them up-to-date.

“Your Committee therefore recommends that the Board of Education offer a promotional salary of \$50 above the maximum for length of service (\$800).”

When teachers have reached the salary of \$800 they may submit evidence of the work they have done in universities, organizations for educational study, etc., and if the character and amount done since they have been teaching is sufficient to entitle them to recognition, they shall receive an increase of salary to \$825 the next year, and \$850 the following year and thereafter, so long as their work and progress are satisfactory. In order to protect teachers from overwork, the amount they may do in any one year is limited. This measure was constructed with the help of the teachers, and was submitted to them. They approved of it by a large majority.

Teachers who keep up their interest in education from the time they begin teaching, need not do more than one hour of extra work a week, to be prepared for the promotional salary. Every teacher who is in health could do and desires to do as much as this, in order to keep herself and her work abreast of the times.

In some school systems there is a tendency to retain teachers but a short time—to employ them when they are young and fresh, work them to the point of nervous exhaustion, and then throw them aside for others who are fresh and more up-to-date. In our city this is not the policy, as shown by the table of the length of service of teachers in the Cincinnati schools, given on a following page of this report.

At first glance it will appear that there is danger of such a system becoming antiquated, that teachers who have taught twenty years are not equipped for a modern curriculum and modern

methods. The remedy for this is not a change of teachers, but in their keeping themselves abreast of the times as they go along. Then the system will be perpetually rejuvenated.

Teachers improve with experience up to a certain point where they become skillful. When they find what to them is the best way of doing everything, there is some danger of their becoming mechanical and automatic in method, and progress may stop. Their usefulness as teachers then rapidly declines; for teaching is contagion, it is kindling the spirit of growth and the desire of knowledge and truth, by contact with a growing and progressive mind. "How can he kindle a fire in the breast of youth, in whose own bosom there is no live coal?" Our teachers fully appreciate this and know that it is necessary for them to keep up their interest and progress by a reasonable amount of mental activity. Our oldest teachers are frequently the most progressive, for they have found the secret of keeping fresh and young. To the skill that comes with ripening experience, they add the enthusiasm which comes with deepening and multiplying interests. Such teachers will continue to improve until their physical powers begin to wane; and their usefulness, because of their skill and beautiful spirit, may continue long after that. Such teachers must be guarded, or their ambition will lead them to over-work. In operating the rule for promotional salary, there will be need not so much to stimulate the teachers to accept its provisions, as to watch over them and advise, caution, and restrain them from attempting too much.

With the present provision for keeping the school system rejuvenated, there is reason to believe that our schools are entering on a new era of progress—an educational renaissance, so to speak.

(5) *University Co-operation in Training Teachers.*—The aid given by the University of Cincinnati to the teachers of our city is second only to the advantages it offers the graduates of our schools, (about 40 per cent. of whom enter the University of Cincinnati). Its professors stand ever ready to assist our teachers by courses adapted to their needs, and arranged at times to suit their convenience. Two of the professors came to school buildings upon invitation, and gave courses after school hours to the teachers in the buildings, on educational psychology and on the teaching of history.

The Department of Education of the University is rapidly

developing. Professor Burris of the Albany Training School, New York, has been placed in charge of Education—its history and principles; Dr. Breese, in charge of Psychology; Miss Weber, in charge of Primary Method; and Dr. John Hall, of the New York Training School for Teachers, and of Teachers' College, Columbia University, in charge of the Training of Teachers of the elementary grades.

Students who expect to teach are given two years in the courses of the University in regular college work, and in the last two years devote themselves largely to courses in special training for teaching in the Department of Education. Saturday courses are offered for teachers in this and in other departments of the University.

The Board of Education, recognizing its obligation to the University, set aside November 16, 1904, as University Day. Schools were dismissed in order that teachers might attend the inauguration of the new President, Dr. Dabney. The Board also has appropriated \$3,000 to assist in the training of teachers. Mr. Hall has been employed by the Board of Education at a salary of \$2,500. Authority is also given to utilize the supervisors of our special subjects, drawing, music, physical training, penmanship, and manual training. The Board of Education has appointed one of its members, Dr. Betty, as a special committee on the training of teachers in co-operation with the university.

(6) *Appointment of Teachers.*—It is believed that with such opportunities for training as are offered by our University and with the compensation that is offered by the Board of Education preference should be given to those candidates who have made complete preparation for teaching. The following method of appointment has the unanimous approval of the Board:

All appointments and promotions of principals and teachers shall be made upon the basis of merit, to be determined in cases of appointment by proof of scholarship, professional preparation, and successful experience; and in cases of promotion, by character of service and professional advancement.

In making first appointments, preference in scholarship and professional preparation is to be given to candidates who are graduates of a recognized university, providing they have taken pedagogical courses; in special subjects candidates are to be preferred who have completed a professional course in some recognized school for the training of teachers in that subject.

The things that are to be taken into account in making first appointments are scholarship, as shown by college records and by teachers' examinations, and personal character and general competency, as shown by actual experience in the class room for at least four months. If candidates fail in the latter respect, they will not be chosen because of the fact that they are college graduates. The rule applies to first appointment. All teachers who are doing satisfactory work are re-appointed, and if not they are given due notice. Also if any teacher has done highly acceptable work, and resigns because of illness, or to attend school, or for other good and sufficient reasons, she is not excluded from re-appointment upon the recommendation of the superintendent. All data upon which the superintendent makes his recommendations will be filed. The method will go into operation in January, 1906, or sooner if records can be completed.

(7) *Promotions.*—The promotional salary for professional advancement, just mentioned, involves no change of position. In addition to this, there are two other methods of promotion.

The principal of each school, in accordance with the new rules, is to spend at least one-half of his time in the school rooms in supervising and assisting in the teaching. He is to consider this his most important function. In large schools it will therefore be necessary to give him a helper in administrative matters, such as care of the yards, boys' basements, etc. This "assistant" has clearly-defined duties in addition to those of teacher of a school room, and in schools of over 600 pupils may receive from \$800 to \$1,000 if the schools have only the primary grades, and from \$1,000 to \$1,400 if the schools have the highest grades.

As these positions are stepping stones to principalships, scholastic requirements for promotion to them are increasingly great. Teachers in the grades, to receive the promotional salary from \$800 to \$850, must have done professional work amounting to from two to eight credits, none of which is necessarily university work, as it may be done under the direction of the principal of the school. But for first promotion to First Assistant, 20 university credits are required, for the second promotion, 40 university credits, and for the third promotion, 60 university credits are required. A State Certificate is the only thing that is accepted in lieu of university work. All the above applies to teachers in the employ of the Board previous to January, 1906, as after that

time those teachers are to be given preference in making first appointments, who are university graduates, if they have shown undoubted "teaching power." Positions of first assistants will be filled very gradually and only as the organization of the schools will in no wise be disturbed thereby. It is hoped that this added inducement may check the tendency of good men to drop out of our schools because of salaries being insufficient to support a family.

In addition to the above, positions in the high schools are open to teachers of the elementary schools. In the past two years four women and three men have been thus promoted. Teachers for high schools must be chosen solely with regard to their fitness for the position to be filled, and it would be unwise to lay down a hard and fast rule that promotions should be made from the grades, but if, as far as can be determined, there is equal fitness among candidates, my preference would be to promote. By so doing we should get more mature teachers in the high schools, who understand the limitations of the elementary schools. It may as well be acknowledged that the opinion of educators is divided on this question. Some hold that the methods and subject matter of the secondary schools are entirely distinct from those of the primary schools, and that the period of childhood is so different from that of adolescence, that those who have long dealt with the former are unfitted to deal with the latter. This is partly true, but most children are in the adolescent period before they leave the elementary schools, and in the upper grades the methods and subject matter approach or should approach closely to the high school type, so that there should be no chasm, but a gradual blending of elementary instruction into high school instruction.

A more serious objection is that the high school teacher must be a specialist—a teacher of chemistry, or French, or history, etc., while the teacher in the grades must deal with groups of studies called the common branches. This is a valid objection, unless the elementary teacher has discovered special aptitudes and tastes, and has continued to develop along special lines. Special fitness for the work to be done must be the first consideration.

(8) *Pensions and Retirements.*—As high a standard of qualifications for appointment and promotion of teachers has been established as exists in any American city, and sufficient incentives have probably been given to keep teachers progressive and

improving, without harassing them with a vexatious grind of examinations, other than those prescribed by the law of the State. An attempt was made some years ago to provide for teachers in their old age. A pension law was enacted April 14, 1896. As modified, it provides for the optional payment of \$20 a year by teachers, with the privilege of retiring after thirty years' experience, upon a pension of \$300 a year. In case of physical or mental disability, they may be retired after twenty years of service. All but thirty of our teachers have accepted the provisions of the law. There is a permanent fund of \$44,000 securely invested, only the interest of which is available for pensions. There are at present eighty beneficiaries on the pension roll, and the amount paid them during the year is \$22,880.80. During seven months of the year, they received 90 per cent. of the total pensions due them, but during the remaining three months only 60 per cent. There would have been no necessity of a reduction, but for the fact that an amendment to the law, passed by the last legislature, providing funds to meet any shortage, was found to be technically unconstitutional. This defect can be cured by the next legislature, whereupon pensioners can again receive the full amount of pensions due them. Several teachers who expected to retire this year were deterred from doing so on account of uncertainty as to what they would be paid. As most retired teachers are almost wholly dependent upon their pension, it has become a serious matter to retire them. It will not only leave them with insufficient support, much less than they have been counting on for the last ten years that they have been paying into the fund, but will work a hardship upon all the other pensioners, as every one added to the list proportionately diminishes the amount received by each.

The following table indicates that there are about fifty teachers who are eligible for retirement. Most of these are happily in full physical and mental vigor, but a few must soon retire, and provision should be made for them.

The law that was so worded as to be unconstitutional provided that deductions from teachers' salaries by way of fines, etc., should be paid into the pension fund.

The following extract from the report of the chairman of the Teachers' Pension Fund is worthy of attention:

"Pensioning, permanent tenure of office, and the security of the teacher's position, are largely instrumental in making the schools of Germany the best in the world. All the civilized countries of the world, except Spain, Turkey, and the United States, have for many years retired teachers with a life pension, when their usefulness was at an end.

"Since the National Educational Association in the year 1891 recommended the enactment of laws in the several States to permit and to regulate the retirement and pensioning of teachers, a number of states have passed laws to this end, and it is but a question of time, when all the states will enact pension laws.

"The present School Teachers' Pension Law is an evolution, the result of a number of revisions of the law passed by the Ohio legislature in the year 1896. It still needs amending in order to do the greatest good for the greatest number."

The fact that all the teachers of Cincinnati, except about thirty, have voluntarily accepted the provisions of the law, and

agreed to pay annually the sum of twenty dollars into the pension fund, is the best evidence that they have faith in the value of the law, and confidence that the Board of Education will, in the near future, aid them in their efforts to establish firmly a fixed and reasonable pension for retired teachers, thus benefitting not only those who have grown old and gray in the service, but in a larger and broader way advancing and enhancing the attractiveness and the efficiency of the public school service.

2. **COURSE OF STUDY.**—The new Course of Study put into effect at the beginning of the year has been given a fair trial by the teachers. Full directions and syllabi were issued on the common branches. The Course was made especially explicit in arithmetic, spelling, reading, writing, geography, history, and grammar. At the close of the year every teacher was invited to send in criticisms and suggestions. A committee of the principals, as well as the superintendent, read all the communications, and made a list of recommendations. Without exception the sentiment was that the present Course is on right lines, and the attention given to the essential branches was commended. In the revision of the Course many minor details and less essential topics in grammar, geography, and history, have been eliminated that more emphasis may be given to the essentials.

The Committee on Course of Study has recommended that the New McGuffey Readers be used in the three lower grades. The change can be made without expense to anyone, as the Board will supply the books. This series of readers is the famous McGuffey series, revised and brought up to date. It contains all the excellent features of the old readers. The improved Course in reading will not only give new impetus to the reading and spelling of the grades because of the careful grading of the selections, but will also give the teachers abundant subject matter for moral teaching and character building, for the ethical tone of the new edition surpasses, if possible, the old one on which most of us were brought up. The Course will be gradually extended to other grades, using the present books for supplementary reading, for which they are admirably adapted.

SPECIAL DEPARTMENTS—COURSE OF STUDY.

GERMAN.

Enrollment in German-English Classes....	1,7407
Male Teachers.....	39
Female Teachers.....	149

Teachers of German are hereafter to be preferred who are graduates of the higher schools of Germany, of American Universities, or of the National German American Teachers' Seminary in Milwaukee. The Supervisor of German, Dr. Fick, makes the following observations in his annual report:

The problem of securing suitable and competent persons to replace those leaving from one cause or another, is of great moment and demanding immediate and careful attention. No mere theoretical or superficial knowledge of German will suffice for a proper teacher of German in American Schools. There must be a perfect command, as far as reading and talking, of the language, and moreover, an intimate acquaintance with and a love for the German cultural achievements.

Not only for the purpose of comparison and explanation, but for disciplinary reasons, the German teacher should have, if possible, a mastery, but at all events, more than a cursory knowledge of the English tongue.

A beginning has been made in the forming of teachers' reading circles for continuing the study of German. The benefit which may be derived from them is so obvious, that hereafter greater stress will be laid upon their work. Plans for systematizing and unifying the work in the reading circles are under consideration.

During the year pupils' attention was directed to the life and works of Schiller, in honor of the centenary anniversary of his death. The teachers and supervising German assistants took an active part in the public demonstration in his honor, and songs from Schiller were rendered by a selected chorus of school children.

A considerable collection of German songs set to music has been issued by the Supervisor of Music. No one will deny the importance of such a factor in language training. Many pupils have been led to take up the language through the medium of music.

"Jung Amerika," a publication for the young, written mainly by teachers in these schools, continues in favor here and elsewhere, as furnishing highly valuable matter for supplementary reading.

A series of language exercises based upon the school readers, has been prepared by the teachers of the department, and over 15,000 of them have been distributed by the Board to the pupils of the schools.

The teachers have been supplied with all the helps asked for. There were distributed during the year, 50 copies of the most modern dictionary of the English and German languages, and 200 copies of Duden, Orthographisches Woerterbuch, an explanation of the newly adopted mode of spelling concurred in by the Governments of Germany, Austria, and Switzerland.

Through the assistance of the Board, the services of Dr. Rein, Professor of Pedagogy at the University of Jena and one of the most eminent educators of the world, were secured to lecture to our teachers on the German, French, and English school systems.

The German department has lost through death this year, three highly efficient teachers, Miss Pauline Kusterer, Miss Elizabeth Trimpe,

and Mrs. Augusta Schulze, all of whom had taught with signal success for many years.

DRAWING.

The constructive hand-work and drawing have been kept strictly within time limits on the school program. The Supervisor, Mr. Vogel, has issued a bi-monthly schedule of directions. The course of constructive hand-work in the lowest grades has not been over done, but has been effectively started. The flat drawings of the books have given way to the extensive use of models and colors. The old drawing books have been discarded. Teachers are to be supplied with the Prang Manuals. Extensive correspondence has been conducted with other cities. Our course is in entire harmony with the best practice elsewhere. The high school course has been carefully re-organized, carrying out the plan of the grades. The traveling exhibit of the Western Drawing Teachers' Association was exhibited in the early part of the year to give our teachers some idea of the work done in other cities. A traveling exhibit of our own was prepared at the close of last year. This exhibit was displayed to teachers at the institute last September, and has since been sent for exhibition from school to school for the benefit of teachers, and the instruction of pupils. Opportunity has been given to parents to view it, and thus get an idea of the nature of the art work pursued in the schools. Thirty-six charts of the regular exercises were exhibited at the public library for several weeks, where they received much public attention.

The Librarian has arranged to provide reproductions of masterpieces of art, in sufficient numbers to be loaned to schools for study. The use in the schools of reproductions of masterpieces is growing steadily. In the lower grades the picture only is studied. In grades above the fourth a study is made of the life and works of the artist. As a result, several schools have Art Leagues. Regular meetings are held for the discussion of some line of art work, and at the close of the year, the pupils usually present their respective schools with a picture suitable for wall decoration. The Municipal Art League of the city has also given material assistance in decorating schools; four schools have been beautified under their direction and with their financial aid. Some schools, notably Avondale, have held public art exhibits, and have within the year, purchased many hundreds of dollars' worth of pictures for decorative purposes.

A Round Table of the Special Teachers of Drawing has met bi-weekly. The subject for the year's discussion was "Design." This was in addition to the regular meetings for the discussion of the schedules.

The growing recognition of the educational value of good art instruction demands that those undertaking the teaching of it should be well equipped from the pedagogic as well as from the art side. The Board therefore provided a new rule, that hereafter special teachers shall be preferred who are graduates of some recognized Normal Art School.

HYGIENE AND PHYSICAL TRAINING.

The new manual of physical training which was provided at the beginning of the year, has gone into full operation in all schools, and has given a fresh stimulus to work of the most approved character for the development of a sound body and its control, by the formation of correct habits. A systematic four-year course has this year been prepared for the high schools, and will go into effect the coming year, thus rounding out and completing the work of the grades.

Additional teaching force has made it possible to visit many classes more frequently, and to give all classes more time for special instruction than formerly. The assigned work has been more thoroughly done, and there has been more opportunity to advise class teachers.

The teaching of Hygiene is required by State law. In order that the teaching might be more profitable, and to avoid wearisome repetition, a graded course was prepared with detailed directions, and was issued as a special syllabus during the year. Dr. Ziegler, Supervisor of Physical Training, undertook the supervision also of Hygiene. He visited all the upper classes and personally conducted a lesson in each. He reports: "The pupils are thoroughly interested, and the knowledge which they have acquired will certainly induce them to lead better lives than they would otherwise." During the year a very large number of pupils were advised by him and by teachers under his direction, to have treatment for defective vision and hearing, for obstructions in the respiratory passages, for skin and scalp disease, for spinal curvature and other deformities; and several cases of suspected tuberculosis were referred to proper authorities for examination.

Many of these cases received treatment as soon as the parents were made aware of the trouble.

MEDICAL INSPECTION.

The first step toward official Medical Inspection was taken this year, by the Board of Education, approving the following suggestion of the Health Officer :

Whenever a Principal suspects a contagious disease, he should notify the District Physician. The latter will visit the school, and if he finds the presence of a contagious disease, the case will be excluded from the school, and where the family is poor, the District Physician will, if desired, take care of the case, giving it all medical attention necessary, free of charge. This will apply to whooping cough, measles, eye troubles, and any other affliction, concerning which the Principal may be in doubt."

The resolution was unanimously adopted by the Board, and a copy sent to each school principal. It is too early to report yet as to the effect of the suggestion, but it will receive the hearty co-operation of school authorities the coming year. I believe the Board of Education stands ready to give sympathetic consideration to any plan proposed by the Board of Health for proper medical inspection of pupils in our schools.

MUSIC.

The Supervisor of Music, Mr. Aiken, has laid special stress during the year, upon teachers forming the habit of having a clearly defined purpose underlying each singing lesson. Much attention has been given to "tone placing,"—placing the singing qualities of the vowels on the speaking voice. The difficulty of getting children to interpret printed symbols into the appropriate sounds, has been overcome by abandoning, for a time only, the conventional syllabic names of the notes, and substituting a neutral vowel sound, until the minds of the children, as well as their eyes were active.

The teachers understand that "seeing must include mental interpretation," but pupils, though they gaze intently at the printed symbols, often fail to get the message that the symbols should convey. The work of the year in overcoming this difficulty has been so encouraging that it is probable, in the near future, the conventional do, re, mi, will be abandoned almost entirely in the seventh and eighth grades.

Attention has been given to the correct emotional development of children. Two collections of rote songs—one German

and one English—were distributed to all schools during the year. The effect of the beautiful sentiments associated with the appropriate music will be lasting, and in the healthy development of the emotions will bring about a harmony of thought, feeling and conduct, such as no other study will give.

Music charts have been liberally provided for all lower grades of our schools, all grades have been abundantly supplied with music readers and several new pianos were purchased during the year. There are now 75 pianos and 6 organs in our schools.

WRITING.

The progress in the past year in no department is more noteworthy than in the department of writing. The Supervisor, Mr. Steadman, has completed for publication, a system of practical penmanship, based on correct principles. He has introduced many of these ideas into the work this year, especially in the upper grades. He has taught classes himself with remarkable results. Specimens of rapid penmanship, without previous preparation, were collected from each eighth grade pupil in the city, and attracted the attention of the *Penman's Art Journal*, which pronounced them examples of the best practical business writing done in American schools. The teachers in all grades have assisted heartily. Our schools fortunately soon got over the "Vertical Writing" craze which swept over the country a few years ago, and which has this year been abandoned by Chicago, Cleveland, and other cities. The aim in our writing is easy movement, rapidity, and legibility.

KINDERGARTENS.

The addition of Kindergartens to our schools, as a special department, will go into effect immediately, as the following resolution, unanimously adopted by the Board of Education, shows:

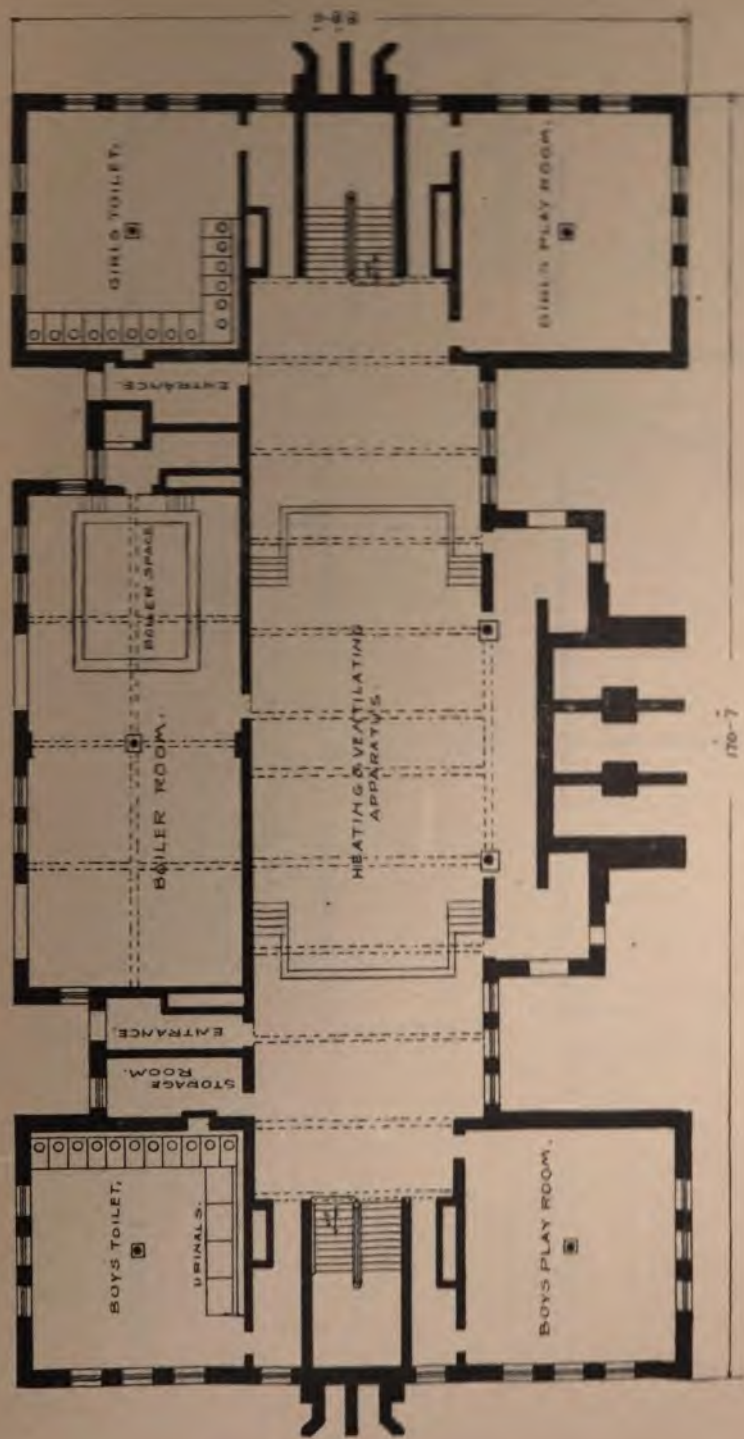

"That two Kindergartens be established in September, 1905,—one at the Lincoln School, with a head teacher and assistant, and another at the First District School, with a head teacher and assistant. Head teachers to receive \$400 for the first year, and a \$50 annual increase until the salary shall be \$650, and the assistant to receive \$100 a year. Kindergartens to be opened for children of five years of age and over. It is recommended that for 1906, funds be set aside for the maintenance of at least seven Kindergartens."

Kindergartens were introduced into Cincinnati in 1880, and our city has become a center for training teachers in this work. The Cincinnati Kindergarten Association has a national reputation. Its President, Miss Annie Laws, has been honored with the presidency of the International Association, which met in this city in 1899. There is also a flourishing German Kindergarten Association. Its President, Mrs. Markbreit, has, through her charities and her great interest in education, rendered it one of the great institutions of our city. These two associations have established more than thirty Kindergartens in this locality. The Kindergarten Training School for Teachers was established in 1880. It provides a two-year course.

The Board has provided that only graduates of Training Schools of recognized standing shall be appointed as Kindergarten teachers. In their management and extension, the assistance and advice of the above-named organizations will enable us to avoid errors, and to introduce gradually, as needs demand, a system of public school Kindergartens that will command the confidence of the people of our city.

The Kindergarten in the Lincoln School on Delta Avenue, and the one in the First District on Liberty Street, will be assumed by the Board of Education at the opening of school, in September, 1905. The Board provides for seven altogether in 1906.

It is the belief of the Kindergarten Associations that the introduction of seven Kindergartens the coming year is ample, as many, in fact, as they would recommend. These are to be opened at present only for children five years of age, and only where forty or more children will get the benefit.

These Kindergartens are not to be merely nurseries for young children. They are to be distinctly educational, taking children at the most impressionable age, training their hands, bodies, and mental faculties, and leading them by the delicate art of trained teachers into the formation of correct habits of behavior and right ideals of living. The impression left by a good Kindergarten will be lifelong and righteous and beautiful altogether.

MANUAL TRAINING.

The Committee on Manual Training has given prolonged consideration to this subject, and after visiting the excellent sys-

tem at St. Louis, determined to recommend the adoption of a similar system here. The following resolution was adopted by the Board of Education in July :

"It is recommended that Manual Training, consisting of shop-work for boys and Domestic Science for girls, shall be introduced in the Seventh and Eighth grades; instruction to be optional only for children not in walking distance of centers; that as many centers be established in September, 1905, as the Committee on Funds and Claims may be able to provide for, at an estimated cost of \$1,000 each; and that funds may be set aside to provide at least ten centers in the year 1906. It is recommended that a supervisor of shop-work and a supervisor of Domestic Science be employed, and as the number of centers established will justify it, assistant teachers not to exceed ten in number, salaries to be adjusted later."

Mr. Ball was selected as supervisor. He has received his training in the best schools of the country, and has had wide experience in teaching the subject, not only in technical schools, but in the schools of San Francisco, Chicago, and elsewhere. He was selected by the United States Government to install the work in the schools of Porto Rico. He is to have general supervision of Manual Training and especial oversight of the work of the boys. Miss Ullrich, one of the supervisors of Domestic Science of St. Louis, whose work was especially favorably noted on our visit to that city, has been put directly in charge of the work of girls. Each will be given as many assistants as necessary, probably three each to begin with.

The money available is found sufficient to equip five centers immediately. These will be located at the Third Intermediate, Fourth Intermediate, Oyler School, Kirby Road, and Price Hill (where there is already a partial equipment). This will accommodate about 1,200 pupils. Next year other centers will be established as rapidly as needs demand. In one year it is expected that all will be accommodated.

The work begins in the seventh grade and continues through the eighth. The work for girls is entirely distinct from that for boys. Each has a separate equipment. The equipment is to be first-class in every respect and in keeping with that in cities that have had most experience in such matters. Classes are to give one and one-half hours a week to the subject. The time is not to be taken from what are considered the more essential studies, but from concrete geometry, nature work, etc. So far from interfering with essential studies, it will re-enforce them. Manual training is itself an essential study, and is so considered all over the civilized world. It is a compulsory branch in some States,

and is recognized as a necessary branch in almost every city. Combining as it does for boys accurate calculation, mechanical drawing, manipulation of tools and materials, and alert intelligence at all times, and for girls expert training in those household arts which all should know and so few do, it is strange that in so practical a community as this the demand for it has not been met before. It gives us the advantage now, however, that we may profit by the experience of other cities, and establish a tried and proved system without any experimenting or probability of failure. The course is distinctly educational, is arranged in proper sequence, and requires special and pedagogical training of teachers. It is serious work and will lead to respect for manual labor. It is for all, for those who will go to college, and for those who will go immediately to earn a livelihood. President Eliot, of Harvard College, says he values as highly one year of manual training as one year of any other subject to which equal time has been given. It is introduced at that period of the development of youth before habits of clumsiness become fixed; when accuracy of perception, deftness of hand, and co-ordination of muscles and their subordination to the will are most susceptible of development.

EDUCATION OF DEFECTIVE CHILDREN.

The education of deaf children, both by the oral and sign method, has been conducted in a special building rented for this purpose, by a competent faculty of five teachers. This year the Board proposes to offer a similar opportunity to blind children. The Misses Trader have for some time carried on this work with a class of some fifteen children, who are too young to send to a State institution. The Board will open and equip a school for the Blind immediately, in connection with the Oral School on Sixth Street. It will be placed in charge of a teacher especially fitted for such work.

There is still another class of defective children in our schools who are deserving of consideration. I refer to those who are intellectually deficient, who either through persistent absence or mental inability are unable to keep up with their mates. In large schools, if an ungraded room could be established, in which such pupils could receive the attention of a teacher especially adapted to the work, it would be a blessing, to such children, and a relief to the regular grade teachers, who have their time

fully occupied in caring for normal children. Most of this class of defectives are simply slow and need help for a time, but others need continued and very sympathetic attention from an early age, or there is great danger of many of them degenerating morally and developing criminal tendencies. I do not now make a special plea for ungraded rooms to be established, though I believe it is worth considering, but when pupils become incorrigible they should be separated from other children. A truant school of one or two rooms providing for cases that are under the supervision of the truant officers would be a valuable addition to our system, and I believe it is necessary. The Committee on Special Schools has discussed the matter, and I believe it has their approval. It is spoken of elsewhere in this report, in the account of the truancy department.▲

3. TEXT BOOKS AND SUPPLIES.—By action of the Board, taken September 5, 1905, free text books are to be provided for all pupils of the elementary schools.

In 1900 the Board introduced free books in the upper grades for all pupils and in all grades for indigent pupils.

This year the extension includes the three lower grades. The total number of free text books now owned by the Board is 121,000, not including the number purchased for the coming year. These books have been collected, repaired, fumigated, newly covered, and returned to the respective schools from which they came, during the summer. About 20,000 volumes were destroyed as unfit for further use. Books are inspected frequently through the year. Through the vigilance of the teachers and principals the books are carefully handled by the pupils, who for the most part take commendable pride in respecting school property.

SUPPLEMENTARY MATERIALS.

The schools are equipped with working apparatus as follows :

Number of Globes.....	282
Number of Maps.....	1,480
Number of Charts.....	365
Volumes of Supplementary Reading.....	41,711
Schools with Museum Collections.....	42

The following list gives some idea of the scope of the sup-

plementary reading furnished to the different grades by the Board of Education :

Supplementary Reading by Grades.

These books are, or will be, supplied in sets of about 25 copies each to different schools. Those marked * are supplied for teachers' use when requested.

Peaslee's Graded Selections are used by teachers in all grades.

First Grade:

- Little Books for Little Folks.
- New Education Reader, I.
- Easy Steps for Little Feet.
- Baldwin Primer.
- Hiawatha Primer.
- McGuffey's Primer.
- *Stevenson's Child's Garden of Verse.
- *Hall's Arithmetic Primer.

Second Grade:

- Stories for Children. Lane.
- Story Reader. Logie.
- Nature Reader. Beebe.
- Williams' Choice Literature, I
—Primary.
- Harper's First Reader.
- McGuffey's New First Reader.
- New Education Reader, II.
- *Fables and Rhymes. Adams.
- *Old-Time Stories. Smythe.
- *Five Little Strangers. Schwartz.

Third Grade:

- Great Americans. Eggleston.
- Fairy Stories and Fables. Baldwin.
- New Education Reader, III.
- Legends of the Red Children. Pratt.
- Boy on a Farm. Abbott.
- Folk Story and Verse. Adams.
- Williams' Choice Literature, I
—Primary.
- McGuffey's New Second Reader.
- Harper's Second Reader.
- Progressive Course in Reading, II.
- Tales of the Ancient Hebrews. Herbst.
- *Geographical Nature Study. Payne.
- *Home Geography. Long.
- *Robinson Crusoe.

Fourth Grade:

- Fifty Famous Stories. Baldwin.
- People of Other Lands. Shaw.
- New Ed. Reader, IV.
- Williams' Choice Literature, II
—Primary.
- McGuffey's New Third Reader.
- Aunt Martha's Corner Cupboard.
- Stories of Great Artists. Horne.
- *Discoverers and Explorers. Shaw.
- Progressive Course in Reading, III.
- *Ethical Stories in White's School Management.
- *Steps in English, I.

Fifth Grade:

- North America. Carpenter.
- *First Book in American History. Primary History. McMaster.
- American Life and Adventure. Eggleston.
- Four Great Americans.
- Four American Inventors.
- Williams' Choice Literature, I
—Intermediate.
- Old Greek Stories. Baldwin.
- *Ethical Stories in White's School Management.
- *Ten Common Trees.
- *Steps in English, I.

Sixth Grade:

- Asia. Carpenter.
- Europe. Carpenter.
- *Story of the English. Guerber.
- *Story of the Romans. Guerber.
- Story of the Greeks. Guerber.
- Old Greek Stories. Baldwin.
- *Myths of Old Greece. Adams.
- Old Stories of the East. Baldwin.
- Williams' Choice Literature, II
—Intermediate.
- Story of Ulysses. Clark.
- *The True Citizen.

Seventh Grade:

- *Discovery of the Old Northwest. Baldwin.
- Miles Standish. Longfellow.
- Four American Explorers.
- Carpenter's Europe, Asia, and South America.
- Story of the Thirteen Colonies. Guerber.
- Story of China.
- Story of China. Van Bergen.
- *The True Citizen.
- *Physics in Grammar Grades. Harrington.

Eighth Grade:

- *Earth in Past Ages. Herrick.
- Snow Bound. Whittier.
- Sketch Book. Irving.
- Seven American Classics.
- Stories of Ohio. Howells.
- Julius Caesar. Shakespeare.
- Four American Authors. Cody.
- Four American Patriots.
- Four Naval Heroes.
- Conquest of the Old Northwest.
- Ten Great Events. Johnnot.
- Evangeline.
- Story of the Great Republic.
- Lamb's Tales of Shakespeare.
- *Self Help. Smiles.
- *Physics in Grammar Grades.

Many of the above-named books are supplied in sets of 25 or more to all schools in the city, others are supplied as requested. Their use is general, and has done much to re-enforce the teaching of reading, history, and geography.

The requisition for reading material will not be so great the coming year, as all schools are fairly well equipped, and the cost of keeping up the list will be slight in comparison with first equipment. There are, however, a few gaps in nearly every school which still need to be filled before they are fully equipped. Where books remain unused in any school they are called in and sent to schools where they will be put to use. Principals now give at least half their time to active supervision of class rooms, and one of their clearly-defined duties is to place teaching appliances at the disposal of teachers, and see that they are properly used.

In addition to the supplies provided by the Board, almost every school in the city has its own library and many have their own museum collections. Some of these are quite extensive, notably at the Sixth, Tenth, Twenty-third, Twenty-seventh, Chase, Hoffmann, Lincoln, Linwood, Morgan, McKinley, Oyler, Webster, Westwood, and Whittier Schools. A score or more of other schools have highly creditable collections, and every school has made a beginning. I should like to call the attention of public-spirited citizens to the opportunity of being of great service to their community, by endowing the public schools in their vicinity with a fund for library, museum and art collections. Five of our schools have been greatly assisted by the benefactions of individuals, or the donation of local public libraries. The sup-

plies furnished by the Board of Education, however liberal, will in any city leave abundance of room for private benefactions which will conduce to culture.

CUSTODIAN.

In order that supplies may be distributed with speed and uniformity, and repairs made as they are needed, a custodian or store-keeper has been appointed by the Board. The repairs to books alone has cost the Board about \$1,800 a year, so it is believed no increased expense will be occasioned by the new department. If he takes one school at a time, inspects the stock and sees that it is kept in good condition, he will be fully employed, and will be of great service to the school system.

4. EVENING SCHOOLS.—In foreign countries one of the chief educational topics considered at present is "continuation schools." In some countries children who reach fourteen or some specified age are permitted to go to work, provided their employer sees that they continue their education for certain hours each day, in schools provided for the purpose. In America, in all the leading cities, schools for this purpose are provided in the evenings, but attendance is not compulsory. Our State law provides that children between the ages of 14 and 16 must attend school unless they are at work, but in that event they need not, but must secure an age and schooling certificate stating that they are over fourteen and can read and write English. This office has issued, after proper examination, about twenty-four hundred such certificates in the past year. It is safe to say that fully one-half of these will get no more schooling, unless attendance upon evening or continuation schools is made compulsory, where such schools are provided. Pupils must be over fourteen years old to attend evening schools, their attendance is entirely optional, and there is no way of preventing pupils from dropping out at any time. Under the circumstances, the usefulness of night schools seems somewhat limited. The vigorous enforcement of the law for attendance on day schools, and possibly other causes, have somewhat lessened the attendance on the elementary night schools, which was 1,103 this year, as compared with 1,222 the year before. The attendance in the evening high schools has increased, being 1,136 this year,

as compared with 938 last year, and 736 the year before. The fact that additional courses were offered in the High Schools, and the schools given such standing that the graduates were admitted to the bar examination upon certificates, as in the day High Schools, has no doubt contributed to their popularity.

The courses offered are: (1) An Academic Course of four years, leading to an accredited Diploma, and taught without exception by University graduates; (2) A Commercial Course; (3) An Industrial Course (as yet only begun),—with Mechanical Drawing. The latter department has been fully equipped, and has been overcrowded with students. The extension of the High School Course to eight months has been successful. It is proposed next year to place the West End Evening High School in the Hughes High School building. The East End High School is already in the Woodward Annex. There are obvious reasons for placing evening High Schools in High School buildings. The members of the Board on the Evening School Committee, and especially the indefatigable chairman, have given these schools largely of their time and attention. The Board has generously responded to every request for supplies or funds. The principals and teachers have held the students by their sympathy and earnestness, as well as by their superior scholarship and preparation for the work.

The coming year an effort will be made to put new vigor into the elementary night schools and materially improve them. The attendance upon them is so fluctuating and irregular, as to make effective work extremely difficult.

EVENING SCHOOL STATISTICS.

1. Total cost of Evening Schools.....	\$8,911	75

EVENING HIGH SCHOOLS.

Commencement Program at Music Hall. Major Wm. J. Klein, Chairman.

Program.

- MALE QUARTETTE—"Autumn".....*Bullard*
Joseph Schenke, William Schmid, Alfred Hartzel, Gilbert Schramm.
- INVOCATION.....*DR. M. B. FULLER*
Pastor Trinity M. E. Church.
- MALE QUARTETTE—"Annabel Lee".....*Van Der Water*
- ESSAY....."The Evolution of the Book"
MISS FRANCES SEBEL, East School.
- ORATION....."What Shall We Do for Our City Immigrants"
MR. J. DAVID JACOBS, West School.
- DUETT—"O Love, Open for Us Thy Pinions".....*Paricot*
MISS LILLIAN E. SUTTON, MR. ALFRED HARTZEL.
- ESSAY....."Stability of Character"
MISS MAYME J. LUCAS, West School.
- ORATION....."The Congress of Peace"
MR. WILLIAM HENRY BREMER, East School.
- SOLO—(a) "My Lover Will Come Today".....*De Koven*
(b) "Who'll Buy My Lavender".....*German*
MISS LILLIAN E. SUTTON.
- CLASS ADDRESS, MR. GUY POTTER BENTON, Pres. State University, Oxford, O.
- SERENADE—"Fencing Master".....*De Koven*
MALE QUARTETTE, Assisted by MISS SUTTON.
- PRESENTATION OF DIPLOMAS.....*HON. JOHN G. O'CONNELL*, Pres. B. of E.
- REMARKS—MAJOR WM. J. KLEIN, Chairman of Committee,
SUPT. F. B. DYER, AND MEMBERS OF BOARD OF EDUCATION.
- MALE QUARTETTE—"The Dance".....*Hoffman*
Music in charge of MR. WALTER H. AIKEN.
Piano furnished by D. H. BALDWIN & Co.

5. ALLIED EDUCATIONAL INSTITUTIONS.—The system of Public Education in Cincinnati now affords the youth of our city a complete education from the Kindergarten through the University.

The advantage of having as the crown of our educational system a great and well-equipped University accounts for the fact that a larger percentage of our high school graduates attend higher institutions of learning than in any other city west of the Alleghenies. It also makes possible a more complete training and a higher education of teachers than is possible in any city of the Middle West. It also affords unexcelled opportunities to teachers now employed, to improve themselves and elevate the character of their teaching. The University of Cincinnati is fully aware of its responsibilities and opportunities, and has,

through the sympathetic and tactful spirit of its President and Faculty, won the confidence and secured the hearty co-operation not only of the teachers of the Public Schools, but of the Board of Education. A joint committee of the University and the Board of Education has been appointed to consider the relations of the two departments of Public Education, and the personnel of this Committee is a guarantee of their hearty co-operation.

The result of their efforts has been spoken of elsewhere in this report, as also has been the co-operation of the Kindergarten Associations in this city. The union of these agencies, cordial, able, tactful, unselfish as they are, with the public schools of the city, enables our institutions of public education to present a united front, as they work together for the common good of all.

THE PUBLIC LIBRARY.

Among the highly important aids of the schools should be mentioned, with more than passing notice, the Public Library of our city. Any teacher may organize a Library League in her school, and may draw at one time books to the number of one-half of the pupils in her room, not including more than three copies of any one book. These books may be retained throughout the year, and circulated among the pupils by the teacher. There are now about 1,700 volumes available. In addition to this, teachers may draw as many as six books at any one time for use in school work. The Library has a large collection of colored photographs and other pictures, ten of which may be drawn on one card. There are also 600 lantern slides which may be borrowed for a limited time.

Last winter, talks illustrated by stereopticon views were given at the Library by pupils of the high schools, assisted by the Librarian. Subjects were chosen because of their connection with the school work of the various classes. In connection with the high schools there was much school reference work. The debating societies and classes in literature and elocution made necessary a large amount of special work. Individual help was given, and bibliographies were prepared when asked. Books and magazines were reserved on shelves for the use of pupils. Also a large number of pupils from the Intermediate grades came to the Library for help in preparing their lessons. An "Index of history and biography for seventh and eighth grade

pupils" has been prepared by the First Assistant of the First Intermediate School, which indicates what questions may be asked by children from those grades.

The Seminary room of the Library was regularly used by the Evening High School Literary Club and by the following teachers' clubs: Eighth Grade History Club, Ohio Teachers' Reading Circle, Round Table in Psychology, Ohio History Club, and the Seventh Grade History Club.

The above is a very brief and inadequate summary of reports furnished by the Librarian, Mr. Hodges; but they are sufficient to justify a public acknowledgment of the indebtedness of our schools to the great institution which he represents.

VACATION SCHOOLS AND PUBLIC PLAYGROUNDS.

The Sixth, Sherman, and Twenty-seventh District School buildings have been used the past summer for schools for children in crowded districts, under the direction of philanthropic organizations. The attendance was large. An exhibit made at the close of the season gave convincing evidence that the work was of high educational character and of great benefit to the 1,000 children who engaged in it.

The school grounds of the city were thrown open to children during the summer, and are hereafter to be kept open during daylight of all school days (from 7:30 a. m. to 5:30 p. m.)

EVENING LECTURES FOR THE PEOPLE.

In the Sixth District School building on Elm Street, another course of lectures was given the past winter. The attendance was better than it was the preceding year. Music was added to the program of lectures. The concert-lectures were largely attended. This feature will be made prominent the coming year.

ZOOLOGICAL GARDENS.

In order that the annual visit of our children to the Zoological Gardens might be of greater educational benefit, the management secured the services of Dr. Guyer, of the University, to address the teachers on "How to get the most good out of a visit to the Zoo." These lectures were given at the gardens on three successive Saturdays, 434 teachers attending.

6. **COMPULSORY ATTENDANCE.**—The principals of the schools have promptly reported absentees, and the truant officers, now three in number, have attended to all cases reported (over 7,000), and in most cases with success. They have made strenuous efforts to enforce the law. In granting Age and Schooling Certificates, this office has not made an exception during the year. No child of compulsory school age under the provisions of the law was granted a certificate.

This year a record of ages of all pupils in the public schools will be made and kept for future use. A compulsory registration of births would be of great assistance to the attendance department, as in many cases it is now impossible to verify ages. The compulsory school age is from 8 to 14. It is impossible to tell how many children evade the law, as authentic records of ages and statistics from other schools are not available. It seems probable there is a considerable number. It is proposed the coming year to take the enrollments and investigate them, and see what becomes of children who drop out; also to compare the number at different ages below fourteen, and ascertain the amount of falling off. Many other cities are making a similar investigation, so that there will be an opportunity for comparison of methods and results, through correspondence.

JUVENILE COURT.

The Children's Court, established in this city under the jurisdiction of Judge Caldwell, has been vigorously administered. Truants and incorrigibles have been carefully supervised and placed under as favorable conditions as possible. The great need of a school for this class of defective children is spoken of elsewhere in this report. The Board of Education has a regulation requiring the co-operation of teachers and principals with this Court.

7. **EXAMINATION OF TEACHERS.**—The Board of Examiners has held five examinations of teachers.

The first in September,	Number of applicants,	119
The second in November,	" " "	59
The third in January,	" " "	129
The fourth in March,	" " "	127
The fifth in May,	" " "	124

Total..... 558

By the new law, all teachers having less than five years of experience are required to be re-examined in all branches, no matter how excellent their standing or how efficient their services as teachers. It has been the policy of the Board of Examiners to give a thorough examination of teachers when they enter the profession, and, after that, depend upon their success as teachers and their professional growth in re-certification. If teachers are subjected to a continual grind of re-examinations, their attention is distracted from their work, they are harassed with uncertainties, they are kept plodding over the same dreary routine, and have not leisure or opportunity to make real advancement in professional studies. It is hoped that the law may be modified in the near future.

In accordance with the law, the examiners have established the following regulation:

1 yr.	Certificate, an average of 75, no branch below 70, no experience req'd.
2 yr.	Certificate, an average of 80, no branch below 70, 1 yr. experience.
3 yr.	" " " " 85, " " " 75, 1 yr. "
5 yr.	" " " " 90, " " " 80, 1 yr. "
8 yr.	" " " " 95, " " " 85, 5 yrs. "

SUMMARY OF THE YEAR'S PROGRESS.

1. Five new buildings of modern type projected, the plans of which are to be found elsewhere in this report.
2. A site selected for a new high school to take the place of Hughes, and five other lots or additions to school grounds purchased.
3. A mechanical engineer appointed to attend to heating, ventilation, and sanitation.
4. Manual training in the seventh and eighth year, consisting of shop work for boys and domestic science for girls. Five centers properly equipped and a corps of eight special teachers employed.
5. Kindergartens introduced for children five years of age, as part of the Public School System.
6. Co-operation with the University, and joint support of a Training School or Teachers' College, by the University and Board of Education.
7. A School for the Blind opened in connection with the Oral School for the Deaf.
8. Free text books extended through all the elementary grades, and a custodian appointed to repair and distribute them.

9. An increase of salaries of teachers. The minimum raised from \$400 to \$450, and the maximum from \$700 to \$850. Janitors' salaries raised twenty per cent, and their duties clearly defined.

10. A civil service system of appointing teachers absolutely upon merit, and the standard raised to university graduation for elementary grade teachers, and graduation from special schools for special teachers.

11. The number of pupils per teacher reduced from fifty to forty, all basements abandoned, and overcrowding regulated.

12. Professional spirit upon the part of teachers, nearly 900 of whom have taken courses in universities or other organizations designed for their improvement.

13. Complete revision of Rules and Regulations.

In conclusion, the Board of Education is to be congratulated upon the harmony which has prevailed in all of its proceedings. The year has been marked by substantial progress, and the advance has been made with a united front.

Respectfully submitted,

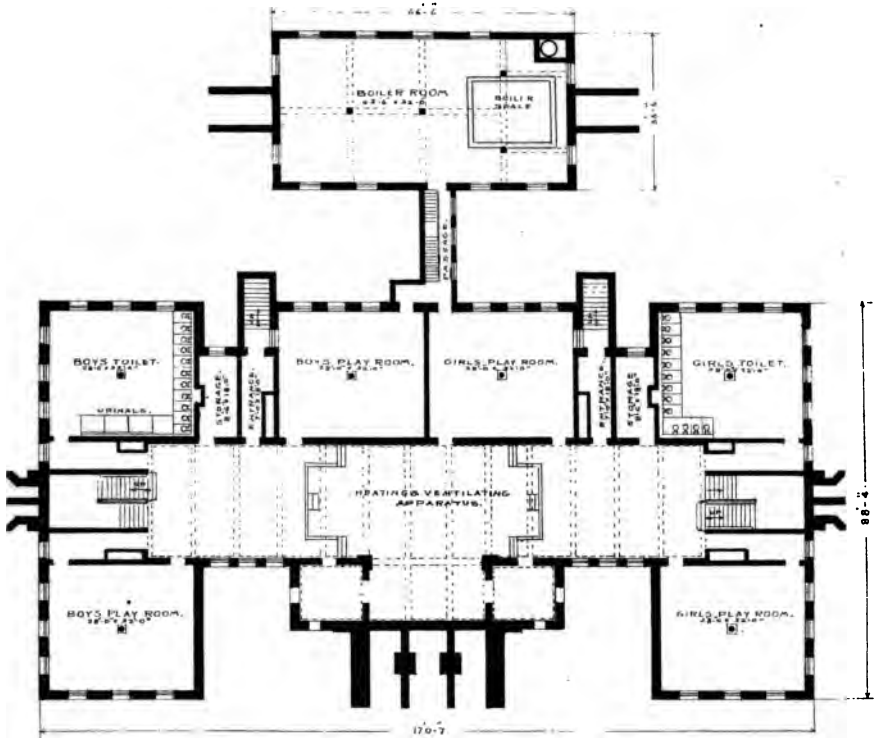

F. B. DYER,

Superintendent of Schools.

REPORT OF THE SUPERINTENDENT OF SCHOOLS ON HIGH SCHOOLS.

CINCINNATI, O., May 11, 1905.

To the Honorable, The Union Board of High Schools:

GENTLEMEN—Strenuous effort has been made during the past year on the part of all the High Schools to deserve and secure the confidence of the people of this city.

The Courses of Study in the leading cities have been examined and compared by the teachers. Representatives of our schools, both principals and teachers, have visited the High Schools of St. Louis, Cleveland, Chicago, Washington and Indianapolis, and there has been correspondence with many other cities. The teachers in various departments have consulted the highest pedagogical authorities upon their work, and after numerous conferences have submitted reports. The Course of Study has been worked out in detail in all departments, and has been harmonized, unified, and thoroughly organized, and is now ready to be submitted for your approval. The suggestions of Universities and Colleges have been carefully considered, and their requirements fully met. The co-operation of the President and Faculty of the University of this city has been cordial, and with their valuable counsel, it is believed that any break in the Course from the High School to the University has been avoided. The High School teachers have acquainted themselves with the work of the Elementary schools, and have assisted in removing any line of cleavage that may have existed between them. The unity of the entire school system of the city from the Kindergarten to the University is nearing realization.

Attention has been given to the ethical and intellectual tone of the schools. A strong Committee was appointed at the Institute last September to consider this important matter. They have conducted an investigation to consider whether there has been any deterioration in the character, conduct, habits and study, and honor in athletic contests on the part of the student body, and

what can be done to elevate the standards. An athletic code securing for our schools strict integrity in all contests has been approved by this Board, and is now in operation. The spirit of work—of honest, intellectual effort, of serious and conscientious preparation of daily tasks, is strong and growing in strength in all the High Schools. Secret organizations and social functions are not unduly emphasized. It cannot be said of our High School students to-day that “fun” is the business and work the interruption of school life.

Attention has been given to the great number of withdrawals from the First Year grade. There always has been and perhaps always will be a great shrinkage in attendance at this point. The environment is new and strange, and the methods are necessarily different, because adapted to more mature students. Also, as pupils are disillusioned, and find High School a place of serious work, some will drop out. Others seem to reach the limit of their intellectual capacity. An effort has been made to make the transition as gradual as possible, to show a kindly interest in the pupils as individuals, and to adapt the work in some of the beginning classes to those who are not so strong. Instead of discouraging them and forcing them out, special classes were formed for them in two of the High Schools, and especial attention given to them. It is too early to report upon the success of the plan, but it is at least a praiseworthy effort to hold pupils in High School.

In short, the teachers of our High Schools are doing all that reasonably can be asked of them;—they have left nothing undone, no effort unspared to make our schools worthy of the entire confidence of the public. The greatness of a school does not depend so much upon the magnificence of its appointments as upon its spirit—upon the ideals and efforts of its teachers, and their success in imbuing their students with high ideals of life and conduct. In this respect I commend the High Schools to you and to our city. I believe that if the untiring devotion and the intelligent effort of our teachers were fully known, their efficiency would be augmented through the appreciation of the public. The feeling that their work is recognized would double their strength.

TEACHING APPLIANCES.

A modern Course of Study calls for teaching appliances. Laboratories must be properly equipped or the courses in science

will be unworthy of recognition. History and the languages call for maps and numerous reference books. The art department and gymnasia require apparatus.

The Board appreciates these needs, and has, as far as it has been able in one year, met the necessities of our schools. Over five thousand dollars have been expended in the past year upon teaching appliances.

The physical laboratories required the greatest expenditure. They have been fully installed and are now the most creditable laboratories in our schools. About one thousand dollars was expended on the biological laboratories, but they are not yet sufficiently equipped. It will take a larger appropriation for the *running* expenses of several departments to carry out the requirements of our new Course of Study, and it will be necessary to add, gradually but substantially, to our permanent equipment.

The sum of thirty-two hundred dollars for the coming year for teaching appliances had been allowed. I have personally investigated into the condition of every department and find that this amount is imperatively needed. All extravagances are excluded, and the apparatus and supplies necessary to carry on the work in an acceptable manner are all that is asked for.

DISTRIBUTION OF PUPILS.

The Walnut Hills High School has been wholly re-organized this year. Pupils were re-classified, the teachers were arranged in departments with a head teacher of each, the number of teachers was increased, the total number of pupils was lessened, partly by transfer and partly by smaller enrollment, and in all ways the school has been made to conform to the requirements of the North Central Association of Colleges and Secondary Schools. In January that Association sent a Committee of Examiners to give the school a critical inspection. An extract from the letter of the Committee follows:

"Last week sixty-seven Ohio High Schools were presented to the North Central Association of Colleges and Secondary Schools for approval. Of this number we succeeded in having forty-one accredited. Some failed because a few teachers had more than six recitations per day; some, because the average number of pupils belonging exceeded thirty to the teacher; some, because the Board of Education has not adopted the policy of employing as teachers graduates of approved colleges; and some, be-

cause the esprit de corps, the efficiency of the instruction, the acquired habits of thought and study, and the general intellectual and ethical tone of the school did not warrant approval.

I am most happy to tell you that your three High Schools met all conditions and have been placed upon the 'accredited' list."

It was the opinion of this Committee, and it is also my own opinion after intimate acquaintance with the working of the three High Schools, that the day has passed for any invidious comparisons of one with another. Local pride in each school is justifiable, but disparagement of another is neither fair nor true, and I am glad to see that it has wholly disappeared from the High School Faculties. The public may have equal confidence in all our schools.

HIGH SCHOOL NEEDS.

From the foregoing, the Board and the public should not infer that our city is doing its full duty in the High School Education of our youth.

We have over one thousand children that are housed in places unsuitable for secondary training. For the eighty-nine teachers in our High Schools, we have fewer than fifty class-rooms, properly so called. Many teachers have no abiding place, but itinerate from room to room.

While I have spoken of our Academic Courses as worthy of our confidence, it must not be forgotten that these are all we have. We do not offer an Industrial or a Commercial Course. This seems remarkable when we consider the tremendous industrial and commercial interests of this city. Our High School attendance is small compared with other cities and is not increasing, but an examination of the attendance in other cities shows that nearly half, and in many cases more than half the attendance is in commercial and industrial courses. Our present school facilities do not permit of the addition of these courses.

What is needed is a new building in the western part of the city in the place of the present Hughes building, and an addition to both the Woodward and the Walnut Hills buildings, which should be constructed with reference to their needs for laboratories, and for commercial and manual training courses. It is generally recognized by educators that a large central school building, while it offers some advantages, is not so satisfactory in

a large city as several high schools of convenient access to different parts of the city. The three schools should offer equal courses and be equipped with as nearly equal facilities as possible.

All these things are well known to this honorable Board, and it plainly recognizes its duty in the matter. The President in his report has ably and tactfully stated it. His suggestions have undoubtedly the unanimous approval of both our educational boards. The need is recognized by all, and all other questions are subsidiary. It is the common sentiment that a new High School building, modern and complete in its appointments, should be erected in some accessible location, and it should be begun without further delay. The financial condition of our city justifies it, the boards approve it, the public desires it, and the times demand it.

The Board of Education has made a beginning by selecting a site for the new building at Clinton, Everett and Linn Streets.

Respectfully submitted,

F. B. DYER,
Superintendent.
